

1322 BATCHING EQUIPMENT

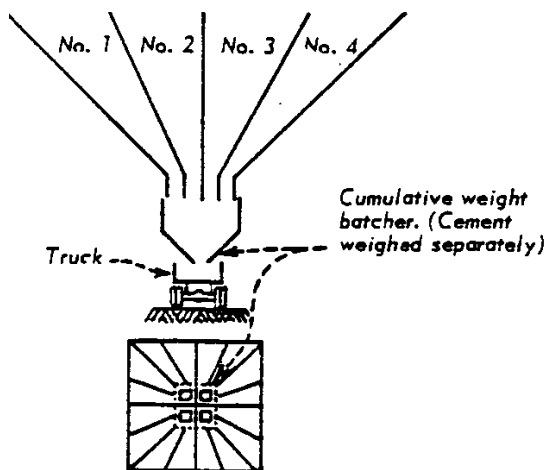

CORRECT

Individual automatic weighing of ingredients assembled into truck or mixer loading hopper by conveyor belts. Discharge of cement batcher to be controlled so that cement is flowing full time aggregate is being delivered by conveyor belts.

CORRECT

Cumulative automatic weighing of aggregates using conveyor belts automatically started and stopped by the weighing equipment and having no gates to stick. Access for representative sampling is afforded.

INCORRECT

Either of above close groupings of bin discharges which cause long slopes of material in bins with resulting separation as material is lowered.
